Subject: preliminary data

Good Morning Alice

As you know we have been sending preliminary data from the CSO program as requested. I wanted to make an important note regarding this preliminary data. The data is unvalidated, and we have noticed some errors in the data that has been sent to USEPA. These errors are common mistakes that would have been caught in the validation process. I wanted to make a note, that these preliminary results need to be taken with a grain of salt, due to the fact that some of the data may be incorrect, or consist of errors/mistakes.

We are in the middle of the validation process now, and will provide the validated data from Attempt #1 when complete.

Thanks and let me know if there are any questions.

Brian Mikucki
